

Project Title:

Product CatLog and Inventory Summary

Project Objective:

It performs basic aggregation function, text formatting and conditional formatting in Excel.

1. sum(), Count() and average()
2. min() and max()
3. Logical Function - IF
4. Conditional Functions - sumif() and countif()
5. Text Formatting - Left(), right() and mid()

Dataset Description:

A product table holds below listed columns dataset.

1)Product_id, 2) Product_name, 3) Brand_name, 4) Price, 5) Quantity 6) Category.

Column Description

Column Name	Description
Product ID	Represent the unique product identifier along with country code and timestamp details. Example: 28-JAN-US, 15-FEB-US
Product Name	Represents the name of the product. Example: Laptop, T-shirt, Headphones
Brand Name	Represents the brand associated with the product. Example: Dell, Nike, Adidas
Price (\$)	Represents the price details of respective product.
Quantity	Represent the quantity of products purchased by the customer.
Category	Represent the grouping of products based on category type.

Data cleaning & transformation: 2 full row duplicate record were identified and cleaned the data in product table.

Duplicate product_id: 17-JUN-IN, 21-AUG-CA

A	B	C	D	E	F	G
Product ▾	Product Name ▾	Brand Name ▾	Price (▾	Quantity ▾	Category ▾	
17-JUN-IN	Laptop	HP	950	25	Electronics	
21-AUG-CA	Laptop Bag	Samsonite	50	35	Accessories	
21-AUG-CA	Laptop Bag	Samsonite	50	35	Accessories	
17-JUN-IN	Laptop	HP	950	25	Electronics
